STORY of MECANIK

For most of our lives, we have been assigned to protect our loved ones, values and WAY OF LIFE in different countries of the world. We have served under different FLAGS, on different continents and under different environmental conditions. We had to be away from our LOVED ones and the things we loved, but we were not alone. We were with people like us who also made huge sacrifices in life. We BRAVELY TOOK ON VARIOUS CHALLENGES AND CONQUERED THEM ALL In the LAST QUARTER century, millions of people working with all kinds of firearms in harsh conditions far from their homes have created a common CULTURE and a Lifestyle. Here, MECANIK was born from this WARRIOR MINDSET. Products that reflect the firearm accessories designed through the eyes of a gun user, and a lifestyle that serves firearm users have been carefully designed, tested and qualified. MECANIK became the brand of those who know how to ENJOY LIFE even in the most difficult conditions and never give up.

NOW IT IS YOUR TURN!

The optic sights have been proven to be the fastest type of target engagement. It provides the greatest hit probability on targets by allowing shooters to stay focused on the target. Shooting with both eyes open also means that the shooter can situationally and environmentally remain aware of what is going on around them at all times.

MECANIK red dot sights increase shooters' confidence with their proven accuracy and performance at optimal levels. We designed our sights according to the inputs given by special forces operators and incorporating state-of-the-art technology. The unique design of our red dot optic's outer frame provides ease of racking the pistol with a single hand if needed. This sight is made to endure and work flawlessly in the most demanding operational and environmental conditions. This is why our optics are found in the arsenals of the world's greatest shooters.

MECANIK red dot sights continue to be a game-changer in tactical applications, as well as sportive shooting, home/self defense, and competition categories.

We are proud to give you the most efficient, reliable, and rugged electronic sighting system in the world.

Welcome to the superior way of doing things with MECANIK

MECANIK® M01 (Micro Reflex Sight)

Pistol optics are designed to provide the highest probability of hitting on the targets by allowing shooters to focus quickly. The MECANIK M01 tactical micro-optic reflex sight is designed in consideration of tactical requirements. During the design process, we worked with special operation forces & law enforcement units from all over the world. It is equipped with high-tech features that will crown its unique patented exterior design. The MECANIK M01 tactical micro-optic reflex sight's TCF (Tactical Concave Face) allows operators to grasp their pistols from the slide more effectively. It also helps to rack their pistols with one hand at the waist band more successfully. Thanks to the aggressive side serrations, the grip area of the shooter on the slide has been increased. The high technology motion sensor in the MECANIK M01 helps the battery life to be preserved when the optic is not in use. Thanks to the light sensor inside, it automatically adjusts the brightness of the red dot that marks the target. This feature is especially vital for shooters working in environments with different light intensities. MECANIK M01 Tactical Micro-Optic Reflex Sight has 3 MOA red dot, which is the ideal dot size for special operation units operating intensively in urban warfare, using CQB/CQC tactics. MECANIK M01 has co-witness feature thanks to its low-profile structure. We are proud to give you the most efficient, reliable and rugged electronic sighting system in the world. Welcome to the superior way of doing things with MECANIK.

MECANIK® M01 UL (Ultralight Micro Reflex Sight)

MECANIK® M01UL (Ultralight Micro Reflex Sight) is designed in consideration of tactical requirements. The M01UL has all the features of the MECANIK M01, but is much lighter thanks to its ultra-durable polymer frame. It is equipped with high-tech features that will crown its unique patented exterior design TCF (Tactical Concave Face) allows operators to grasp their pistols from the slide more effectively. It also helps to rack their pistols with one hand at the waist band more successfully. The high technology motion sensor in the M01UL, helps the battery life to be preserved when the optics are not in use. Thanks to the light sensor inside, it automatically adjusts the brightness of the red dot that marks the target. This feature is especially vital for shooters working in environments with different light intensities. The MECANIK M01UL has 3 MOA red dot, which is the ideal dot size for special operation units operating intensively in urban warfare, using CQB/CQC tactics. The M01UL has co-witness feature thanks to its low-profile structure.

We are proud to give you the most efficient, reliable and rugged electronic sighting system in the world.

MECANIK® M02 (Versatile Reflex Sight)

Pistol optics are designed to provide the highest probability of hitting on the targets by allowing shooters to focus quickly. The MECANIK M02 versatile reflex optic sight is designed in consideration of general purposes. During the design process, we worked with world famous competitive shooter from all over the world. It is equipped with high-tech features that will crown its unique patented exterior design. The MECANIK M02 versatile reflex optic sight TCF (Tactical Concave Face) allows shooters to grasp their pistols from the slide more effectively. It also helps to rack their pistols with one hand at the waist band more successfully. Thanks to the aggressive side serrations, the grip area of the shooter on the slide has been increased. M02 has manual brightness control which has 10 levels; 2 lower ones being NVG and 8 of them being daylight levels. MECANIK M02 versatile reflex optic sight has 3 MOA red dot, which is the ideal dot size for home/self-defense, hunting and competition shooting. We are proud to give you the most efficient, reliable and rugged electronic sighting system in the world. Welcome to the superior way of doing things with MECANIK.

MECANIK® M03 (Competition Reflex Sight)

The MECANIK® M03 (Competition Reflex Sight) is an advanced non-magnified reflex sight that design for Competition and target shooting. The MECANIK® M03 optic sights have been proven to be the fastest type of target engagement. It provides the greatest hit probability on targets by allowing shooters to stay focused on the target. Shooting with both eyes open also means that the shooter can situationally and environmentally remain aware of what is going on around them at all times, especially in competitions where mini-seconds are important. M03 provides a wide view to the shooters thanks to its wide lens. 6 MOA dot allows shooter to keep "both eyes open" from a shooting position under any conditions. This advanced competition reflex sight is designed with a maximized field of view and a clean red dot that deliver improved pistol accuracy in competitive-shooting and target-shooting applications.

We are proud to give you the most efficient, reliable and rugged electronic sighting system in the world.

Welcome to the superior way of doing things with MECANIK.

MECANIK LENS PEN

MMAC_758

MECANIK Lens Pen decrease the contamination on the lens reducing the static electricity thanks to its carbon head. Once cleaning is completed with MECANIK Optic Solution, then clean the lens surface with the cloth softly and the cleaning process is completed with the carbon head.

As MECANIK, we know firearms well. We are also aware of the benefits the add-on/plug on accessories provide to firearms' performance. Additionally, we collect feedback from the operators from all over the world to design the most reliable and innovative products.
This is why MECANIK suppressor will surpass all your expectations.

MECANIK T-SUP 1 Suppressor

MECANIK presents the new pistol suppressor line that features completely modular and configurable aluminium baffles that allows personalization for the shooter. MECANIK T-SUP1 SUPPRESSOR is mainly designed for floating-barrel pistols. Thanks to its unique suspension system, it works flawlessly with every kind of 9mm fluted-barrel pistol. T-SUP1 has a light-weight and durable design made to give the shooter ease and convenience needed for any occasion. It is adaptable to use with any kind of 9mm ammunition.

Over the years tactical clothing has evolved and improved with the advancements in fabric design and materials. Tactical apparel is designed for law enforcement members, public safety professionals, security contractors, recreational users like hunting, and other outdoor adventures to meet the high standards of performance and professionalism these demanding fields require. Often made with ripstop materials to ensure durability, tactical apparel also features thigh-level pockets that allow access to essential tactical gear items.

Unique products equipped with superior technologies are developed by MECANIK R&D. We as Mecanik, work side-by-side with professionals to design, develop and offer the best and most innovative products possible. Mecanik apparel is made with an uncompromising manufacturing process that ensures excellence in every stitch. Mecanik Advanced Apparel makes sure you are going to stay at the top of your game in any terrain and any weather conditions.

We strive each and every day to ensure you accomplish any mission under the harshest physical and environmental conditions. Rugged, comfortable, practical and durable, you will be wearing these pieces on and off the job.

We take our obligation to our environment and the global community seriously. Our raw materials and processes are constantly monitored and optimized to leave the smallest possible ecological footprint.

As a company that caters to professional customers, nothing is more important to us than quality. We guarantee that all of our products are fit for purpose.

- ▣ To build high-quality apparel
- ▣ To provide customers with world-class service
- ▣ To be an ethically and socially responsible

This is the Mecanik Advanced Apparel Mindset.

Alpha Series

PHOENIX Pants

Specially designed for Competition and outdoor activities, Phoenix pants feature advanced Mecstop™ fabric. With 3% stretch margin, elastane-containing textures are placed on the yarn during weaving, thus ensuring durable, long-lasting, flexible use of the fabric. While Mecaproof™ fabric creates resistance against water and dirt in the nature's harshest conditions, its flexible structure gives breath to your movements. Phoenix pants are dyed with high quality Mecolor™ technology, hence they do not lose their color under any circumstances and do not fade under the sun. These pants were designed for trekking and high performance tactical activities with its ergonomic structure, fabric quality and special sewing areas.

It frees your movements by wrapping your body tightly with zip offs in the waist and knee areas. Ultra-durable, deep weight-bearing pockets help you to carry all the tools and equipment you need with you and quickly remove them in case of emergency.

Features

- ▣ Mexstopflex™ square weave is a tear-proof, strong, durable, and provides high performance
- ▣ Water repellent and breathable fabric
- ▣ Minimizes sweating
- ▣ Fade-resistant MeColor™ technology
- ▣ Two ventilation ducts, right and left on the upper part of the knees (can provide airflow by opening the zipper)
- ▣ Side pockets with space for phone or rifle magazine.
- ▣ Metex™ fabric provides extra flexibility in movement
- ▣ Elastic waistband
- ▣ Wide cargo pockets, secure back pockets, hidden knee pad pockets

METE Shirt

Mete shirts manufactured with Mestopflex™ fabric to support the performance of those who take action, while offering comfort beyond its competitors with high quality fabric. Mestopflex fabric prevents wrinkles by stretching during active performance. The Mete shirt provides active body temperature balance with the ventilation holes strategically placed in the armpits and the back, allowing freedom of movement. Alongside its light and soft texture against your skin. Mestopflex™ fabric technology was specially developed for those who like to experience peak performance, also prevents the formation of bacteria and traps sweat odors. Thanks to the stainless snap fasteners on the front, it allows rapid removal for any situation. Curved sleeves with sleeve brit offer versatile styling possibilities. Now your clothes can keep up with your adrenaline-packed lifestyle.

Features

- ▣ Mecstopflex™ fabric square weave (extra elastic)
- ▣ Fade-resistant MeColor™ coloring technology
- ▣ Double-sided zipper
- ▣ Durable, Comfy, Mobile
- ▣ Fold sleeve button
- ▣ Utility pockets, including pen pockets
- ▣ Air vents; discharge channels and air intake channel on the back
- ▣ Velcro on the collar (to avoid ejected empty shells getting in during shooting)

Prime Series

Over the years tactical clothing has evolved and improved with the advancements in fabric design and materials. Tactical apparel is designed for law enforcement members, public safety professionals, security contractors, recreational users like hunting, and other outdoor adventures to meet the high standards of performance and professionalism these demanding fields require. Often made with ripstop materials to ensure durability, tactical apparel also features thigh-level pockets that allow access to essential tactical gear items.

Unique products equipped with superior technologies are developed by MECANIK R&D. We as Mecanik, work side-by-side with professionals to design, develop and offer the best and most innovative products possible. Mecanik apparel is made with an uncompromising manufacturing process that ensures excellence in every stitch. Mecanik Advanced Apparel makes sure you are going to stay at the top of your game in any terrain and any weather conditions.

We strive each and every day to ensure you accomplish any mission under the harshest physical and environmental conditions. Rugged, comfortable, practical and durable, you will be wearing these pieces on and off the job.

We take our obligation to our environment and the global community seriously. Our raw materials and processes are constantly monitored and optimized to leave the smallest possible ecological footprint.

As a company that caters to professional customers, nothing is more important to us than quality. We guarantee that all of our products are fit for purpose.

- ▣ To build high-quality apparel
- ▣ To provide customers with world-class service
- ▣ To be an ethically and socially responsible

This is the Mecanik Advanced Apparel Mindset.

METE Shirt

The all new Lightweight Mecstop™ weaving is designed with polyurethane elastane lycra and sports lycra to provide the user with extra comfort and mobility. While giving you a clean and professional look, Mecstop™ is a leader in tactical clothing for durability and mobility. The air flow channels in the back provides the wearer with breathability, while central chest pockets are equipped for storage needs. The striped curved sleeves and utility pockets provide ease of carrying small items. The lightness of this material aids with fast movements and increases performance.

Features

- ▣ Air flow channels mesh in the back
- ▣ More breathability
- ▣ Roll-up Sleeves
- ▣ Bartacking at key stress point
- ▣ Dual chest patch pocket with flaps
- ▣ Wearable every season
- ▣ Quick dry
- ▣ Extra flexible and strong Mecstopflex™

ACE Coat

Whether for professional, sporting or recreational use, everyone needs the best outfit for bad weather conditions. The all new Mecatex™ lamination includes Ace Coat, a waterproof and breathable treatment, alongside the Mewarm™ fabric technology to keep your body temperature constant. Hidden pocket zippers on the chest offer versatile storage options. The fixed hood design provides superior functionality and protection against all weather conditions. There is a hidden zipper pocket inside for easy access to your valuables, and an inner eyelet for phone, radio or internal media connection cables. Specially designed rubber cuff allows the user to instantly restrict air flow by tightening the elastics in one move.

33

Features

- ▣ Superior waterproofing with Mecatex™ lamination
- ▣ Honeycomb design Mewarm™ technology
- ▣ Protection against bad weather conditions
- ▣ Accessibility and hidden pockets
- ▣ Adjustable cuff
- ▣ Waterproof hood
- ▣ Hook & loop cuffs with velcro
- ▣ Water, oil and dirt repellent

THOR Raincoat

Thor raincoat provides you the mobility and comfort you need in all kinds of outdoor and sporting activities. The all new Mecatex™ lamination is like an armor against water, while the MeColor™ dye technology protects against color fade from UV. Its stylish and functional design allows you to enjoy this in any environment. Two hidden zippered pockets on the front help you to keep your elegance while carrying your important items. The interior perforated nets protect you from sweating, and the adjustable gather cuts your contact with air and rain. The inner eyelet allows easy access to your phone, wireless radio or to any kind of internal media connectivity while helping eliminate cable clutter.

CASUAL SERIES

DRY TOUCH JERSEY

MECANIK®Shooter T-Shirt is produced using Dry Touch®technology, which facilitates the transfer of moisture and air, and allows the air to be evacuated easily from outside to inside and moisture from inside to outside. In the tests, it has been observed that Dry Touch® fabrics absorb moisture faster than cotton and absorb more water than cotton.

The Dry Touch®Shooter T-Shirt, produced with cotton-like features, is less wrinkled and more durable when compared to cotton fabrics. However, it feels soft and cottony when touched.

Features

- Expels moisture easily
- It dries more easily than other fabrics
- It easily takes the air from outside to inside and with this feature, it reduces perspiration to a minimum
